Mr. Joe Legare

Assistant Administrator for Environment and Stewardship

U.S. Department of Energy-RFEO

10808 Highway 93, Unit A

Golden CO 80403-8200

RE: No Further Accelerated Action Justification PCB Potential Areas of Concern (April 15, 2004)

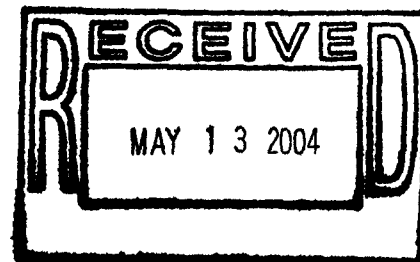

Dear Mr. Legare:

The Colorado Department of Public Health & Environment is satisfied that the effort to characterize, remediate, and confirm residual contamination levels at these PCB contamination sites is adequate. The proposal for No Further Accelerated Action at these 18 PACs is approved.

Subsequent to the removal actions at these sites, the Department requested additional information in order to justify a No Further Accelerated Action decision. Groundwater samples were collected downgradient of PAC 700-1102 to verify that PCB contamination is not a threat to surface water via ground water. A recent white paper on dioxin-like compounds in transformer oil evaluated whether PCB action levels are adequately protective of potential levels of PCB congeners with dioxin-like properties. Both of these efforts have satisfied the Department's remaining concerns.

If you have any questions, please contact me at 303-692-3367 or Carl Spreng at 303-692-3358.

Sincerely,

Steven H. Gunderson
